\* Longer Life compared to standard discs, performance may vary due to materials and operational factors.

**TRADE QUALITY TOUGH**

STAINLESS STEEL & HARD METALS  
Resurfacing, blending and deburring

METAL  
Removing scale / rust and coarse welding marks.  
Removing rust, oxidation, corrosion

CONCRETE & MASONRY  
Stripping coatings and paint/graffiti off concrete, cement, stone and other hard materials

COMPOSITES & EPOXYS  
Removing parting lines and seams on fiberglass, kevlar and carbon fibre parts with minimal loading

TIMBER  
Heavy sanding, shaping, grinding and carving  
Removing paint or varnish from weatherboards & fences

ALUMINIUM  
Removing welds, paint, coatings and oxidation without loading on soft metals

Remove pressure will reduce multiple steps.  
Maxx Flexi-Strip discs can be used instead of Fibre Discs, Wire Wheels and Depressed Centre Wheels for: Deburring, stripping, blending and finishing, with one product to reduce multiple steps.  
Heavy pressure will remove welds, light pressure will fill finish similar to an 80 grit flap disc without gouging.  
The Nylon web is tough enough to deburr stainless steel, yet soft enough for use on aluminium, epoxies and soft materials while conforming to difficult profiles as well as flat and uneven surfaces.
